Education

Southern New Hampshire University | Manchester, NH

May 2026

B.S. in Computer Science with Concentration in Software Engineering | GPA 3.6

- **Relevant Coursework:** Full-Stack Development, Mobile Development, Client/Server Development, Data Structures and Algorithms, Secure Coding.
- **Honors:** Dean's List

Skills

Languages: TypeScript, JavaScript, Java, Python, C++, SQL, HTML, CSS

Frontend: React, Tailwind CSS, shadcn/ui, Vite, Angular

Backend/Database: Node.js, Express.js, REST APIs, JWT, bcrypt, PostgreSQL, Prisma, SQLite, MongoDB

Experience

Freelance Full-Stack Developer – RentOps 360 | Bradenton, FL

May 2026 - Present

- Developing a client-facing rental management web application for a trailer rental business, with features for customers, rental units, bookings, check-in/out workflows, and business account management.
- Developed a responsive React + TypeScript frontend using Tailwind CSS and shadcn-style components, including dashboards, customer profiles, unit inventory, rental details, mobile navigation, and booking workflows.
- Built an Express + TypeScript backend using Prisma and PostgreSQL hosted on Neon to manage authentication, business accounts, customers, units, and rental data.
- Deployed the frontend on Vercel and backend on Render, connected the application to a Neon PostgreSQL database, and collaborated directly with the client to define MVP scope, prioritize Phase 1 features, and prepare for beta testing.

Projects

Android Inventory Management App

Java, Android Studio, SQLite, Node.js, Express, Volley, JWT, and bcrypt

- Built an Android inventory app with user accounts, inventory CRUD operations, low-inventory SMS alerts, and improved UI/UX.
- Added search, sort, and filter functionality to improve usability and demonstrate data structure and algorithm concepts.
- Integrated a Node.js + Express REST API with bcrypt password hashing and JWT authentication. Connected the Android client using Volley and tested routes with Postman.
